Candle Care

How to get the most out of your candle

Allow enough time for the wax to melt completely to the edges of the container to prevent "tunneling"

Place candle on a stable, heat resistant surface away from flammable objects before lighting

Never leave a burning candle unattended; be sure to extinguish the candle before leaving the room

Trim the wick to 1/4"-1/8" tall before you relight your candle to keep the wax clean and burning nicely

Avoid burning your candle for more than 3-4 hours at a time

Keep candles out of the reach of children and pets
